PROFESSIONAL SUMMARY

Software Engineering graduate from Jimma University (CGPA 3.42) who builds and deploys full-stack applications with React, Node.js, Express and MongoDB. Portfolio includes 11 live projects across healthcare, HR reporting, travel booking and recruitment. Focus areas include authentication, role-based access control, REST API design and data integrity, including booking-conflict prevention and server-side calculations. Software Engineering Intern at Abajifar Technology PLC and holder of Udacity's AI Fundamentals Nanodegree. Seeking a junior full-stack or backend engineering role.

FEATURED PROJECTS

01 Meridian Hospital Management System

React · Node.js · Express · MongoDB · Stripe

Live demo · Source code

- Built role-specific workflows for patients, doctors, lab technicians, pharmacists and administrators, covering appointments, consultations, prescriptions, lab results, pharmacy stock and billing.
- Prevented appointment conflicts with a MongoDB partial unique index on doctor and start time, so concurrent requests cannot both book the same slot.
- Protected medical records with doctor-patient appointment checks, preserved prescription history through linked corrections, calculated invoice totals server-side, and unit-tested scheduling, billing and FIFO stock logic.

02 HR Reporting System

React · Node.js · Express · MongoDB · JWT

Live demo · Source code

- Built structured reporting workflows for department coordinators, with HR reviewing daily, monthly and overall totals in a centralized dashboard.
- Enforced JWT authentication and role checks in backend middleware for protected routes; authorization does not depend on hidden UI controls.
- Added DOCX and Excel exports to support established reporting workflows.

03 Aerlume - Travel Booking with AI Planner

React · Node.js · Express · MongoDB · Stripe

Live demo · Source code

- Built search and booking for flights, hotels and curated holiday packages against managed inventory, with Stripe payment integration.
- Integrated an AI trip planner and separate customer and administrator dashboards with role-based access.

EXPERIENCE & LEADERSHIP

Software Engineering Intern - Abajifar Technology PLC | Jimma, Ethiopia · 2025

- Contributed to frontend and backend development for company web applications within a professional development workflow.
- Tested and debugged reported issues, maintained existing behavior, and documented changes for the development team.

Grand Food Club Leader - JiT Student Union, Jimma University | 2023-2026

- Led student efforts to monitor cafeteria food quality, hygiene and service standards; collected feedback and reported findings to university management.
- Coordinated club activities and stakeholders across the institute.

FEATURED PROJECTS - CONTINUED

04 JobNest - Job Portal with AI Screening — React · Node.js · Express · MongoDB · Socket.IO

Live demo · Source code

- Built recruitment workflows connecting applicants and employers, including job listings, applications, interview scheduling and real-time messaging.
- Added AI-assisted applicant screening and a talent database to support employer review.
- Implemented JWT-secured roles for applicants and employers, plus recruitment and HR service workflows.

ADDITIONAL PROJECTS

Online Learning Platform - Instructor and student workflows, course and lesson management, timed quizzes, progress tracking and certificate records on completion.
Live · Code

Jimmitti Hotel Booking - Guest, hotel-manager and admin workflows for hotels in Jimma, MongoDB transaction-based double-booking protection and Leaflet maps.
Live · Code

E-Commerce Platform - Authentication, product management, catalogue, cart and checkout over a REST API.
Live · Code

Terra Real Estate - Property search with maps and filters, visit scheduling with double-booking prevention, agent and admin dashboards.
Live · Code

Survey Builder - Nine question types, live analytics, scheduled publishing and CSV, Excel and PDF export.
Live · Code

Ironclad Performance Gym - Trial bookings, Stripe-enabled membership plans, member dashboard and admin tools.
Live · Code

Service Portal - Service-request tracking for user, admin and super-admin roles with server-side authorization.
Live · Frontend · Backend

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, SQL; additional experience with Python, Java and C++.
Frontend	React, React Native, Redux Toolkit, TanStack Query, Tailwind CSS, HTML5, CSS3.
Backend	Node.js, Express, REST APIs, JWT authentication, role-based access control, Socket.IO, Stripe integration.
Databases	MongoDB, Mongoose, MySQL.
Tools	Git, GitHub, Postman, VS Code, Vercel, Render.
AI	Udacity AI Fundamentals; AI features in web apps (trip planning and applicant screening); AI-assisted development with Cursor and Claude.

EDUCATION & CREDENTIALS

B.Sc. Software Engineering
Jimma University, Jimma Institute of Technology
2021-2026 · CGPA 3.42
Relevant coursework: Web Development, AI & Machine Learning, Databases, Data Structures & Algorithms, Object-Oriented Programming, Software Architecture, Testing & QA, Networks & Security.

LANGUAGES

Amharic (fluent) · Afaan Oromo (fluent) · English (advanced) · Arabic (beginner)

CERTIFICATIONS & RECOGNITION

- AI Fundamentals Nanodegree - Udacity
- Fundamentals of Digital Marketing - Google
- Peace Education Training - British Council
- Seven e-SHE Professional Development Certificates - Ministry of Education
- Certificate of Appreciation - Jimma University Institute of Technology
- Letter of Recommendation - Software Engineering Program Coordinator, Jimma University
